

YOUTH® SOLUTION

HYALURONIC ACID-BASED MOISTURIZING TEXTILE

USE HYALURONIC ACID FOR A NATURAL HYDRATION

FEELING OF WELL-BEING

YOUTH® releases pearls of Hyaluronic Acid on the surface of the surface to provide a dose of natural hydration.

NATURALLY-OCCURRING SUBSTANCE

YOUTH® uses a molecule naturally present in the body: **hyaluronic acid**. It is a reference active ingredient in dermatological cosmetics.

ECO-MICROENCAPSULATED TECHNOLOGY

Benefits from a **high performance microencapsulated technology** that ensures a long lasting treatment.

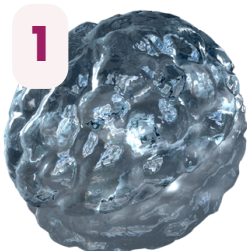

COMPLIANT & RESPONSIBLE

YOUTH® is a 100% French technology and 100% French manufacturing **validated by dermatological laboratories**

Mechanism of action

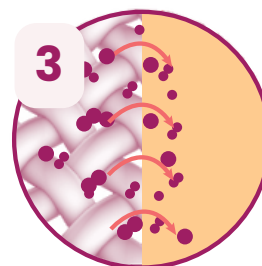

Thanks to YOUTH® technology, the incremental power of hyaluronic acid helps **preserve the skin's beauty capital and make it more glowing.**

1 Microencapsulated active ingredient: Hyaluronic acid

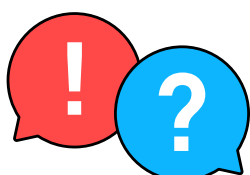

2 The microcapsules attached to the fiber release the Hyaluronic Acid on the skin surface

3 Diffusion of Hyaluronic Acid on the skin

Performance

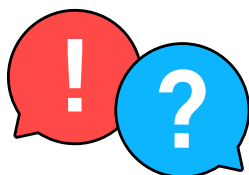

YOUTH® SOLUTION

HYALURONIC ACID-BASED MOISTURIZING TEXTILE

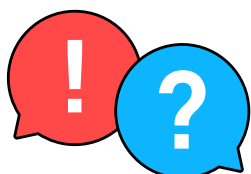

Active treatment substances

Hyaluronic acid is a molecule naturally present in the body, it represents one of the essential components of the skin's dermis. Its function is to moisturize and **protect the skin from external damage**. Thanks to its capacity of elasticity and its richness in water, it fills the space between the cells of the skin and makes it possible to regenerate it for a smooth and bright aspect. As we age, its natural quantity decreases in the skin. This is one of the factors responsible for the appearance of fine lines and wrinkles on the skin. Thanks to YOUTH® technology, the gradual action power of hyaluronic acid helps **preserve the skin's beauty capital and make it more glowy**.

Safety and security

Regulations & Certifications

Application process

YOUTH® technology enables textiles to be functionalized by allowing them to deliver a dose of natural moisture to the skin.
